Alice Knag

SOFTWARE ENGINEER | HARDWARE BUILDER | TECHNICAL OPERATOR

Denver / Boulder, Colorado
845.594.5164 | alice@askalice.me | askalice.me | github.com/AskAlice

PROFESSIONAL EXPERIENCE

Co-Founder | Managing Partner
2026 - now | Colorado

Colorado Asset Management, LLC

Co-founded an automotive partnership acquiring and reconditioning vehicles for resale and Turo rentals. Manage sourcing, pricing, maintenance, listings, guest operations and unit economics for 3 vehicles under management, expanding to 6.

Hardware incubator | IoT
2026 - now | Denver | Boulder

Independent

Standing up an early-stage, revenue-first hardware incubator - Tindie, emu.sh, eBay, and Amazon before any VC ask. Designing an open KiCad swarm of ESP32-C3/C6/S3/H2 room nodes for ESPHome, Matter/Thread, Zigbee, BLE, and Wi-Fi, with SparkFun and Colorado PCB Assembly as partners in motion. Eleven boards on GitHub so far; none fabbed yet.

Software Engineer
2023 - now | Remote

Peklava, LLC

- Engineered lead-generation systems for RateZip and FHA.com processing 80k+ leads annually across Google, Facebook, and programmatic channels.
- Built mortgage rate-comparison tools and conversion funnels driving 1M+ consumer referrals.
- Created landing pages and API integrations reducing acquisition cost 35% while maintaining sub-200ms response times.

Software Engineer
2022 - 2023 | San Francisco | Remote

Sony Interactive - PlayStation

- Built PlayStation web platforms with TypeScript, React, Nest.js, Prisma, Kubernetes, Groovy, Jenkins, and Figma.
- Delivered a front-end table that sorted and fuzzy-searched 50,000+ rows without lag, plus CI/CD automation detail visualizations.

Full-Stack Software Engineer
2019 - 2021 | Boulder, CO

Section.io

- Developed tools with React, Pixi.js, GraphQL, Golang, and Kubernetes across front-end, back-end, and DevOps.
- Built reverse-proxy modules, deployment pipelines, and metrics stacks using Prometheus, Grafana, Graphite, Elasticsearch, and New Relic.
- Served in a PagerDuty on-call rotation as a Platform Reliability Engineer using Terraform, CloudFormation, Jenkins, and GitHub Actions.

Alice Knag

EXPERIENCE, EDUCATION, SKILLS, AND ACHIEVEMENTS

Denver / Boulder, Colorado
845.594.5164 | alice@askalice.me | askalice.me | github.com/AskAlice

PROFESSIONAL EXPERIENCE - CONTINUED

Freelance | Sysadmin | Design

2014 - 2019 | CO | LA

Independent | CU Boulder

- Designed and built interactive tools with React, Pixi.js, GraphQL, Golang, PHP, Python, Laravel, Drupal, MySQL, and MongoDB.
- Worked across HTML5, CSS3, Sass, JavaScript, Vue, Angular, React, Three.js, Jade, Smarty, Materialize, Bootstrap, Photoshop, and Illustrator.
- Produced banner ads, email templates, logos, home pages, and sales funnels clearing $100k/month under favorable market conditions; deployed with Apache, nginx, Kubernetes, AWS, and GCP.

Linux Systems Administrator

2017 - 2018 | Boulder, CO

University of Colorado Boulder

Maintained faculty web servers using RHEL, Ansible, LAMP, and ServiceNow.

EDUCATION

Computer Science | University of Colorado Boulder

August 2017 - May 2019
Left after receiving a six-figure software engineering offer.

Cyber Operations & Pre-Law | University of Arizona

January 2024 - June 2024

SKILLS & ABILITIES

Languages

JavaScript / TypeScript / Node, Golang, HTML / CSS / SCSS, PHP, Python

Frameworks

React, Vue, Angular, Drupal, Laravel, Magento, WordPress, Three.js, D3, Pixi.js

DevOps

Linux, Kubernetes, Ansible, Puppet, CloudFormation, AWS, GCP, Terraform

Design & Hardware

Figma, Photoshop, Illustrator, After Effects / Lottie, KiCad, ESP32, ESPHome

Other

PCI compliance, Agile development, web application security, ethical hacking, marketing

AWARDS, COMMUNITY & HOBBIES

- 2nd place, 2018 CU Blockchain Hackathon (0.5 ETH) | devpost.com/software/bitpixels
- New York State award | four-year captain, FIRST Tech Challenge Robotics Team #6567
- Volunteer development for Rise in Time | riseintime.com
- Music production, game development, inline skating, and home automation | emu.bz/i-promise.mp3

SELECTED HARDWARE, SOFTWARE, AND CREATIVE WORK

Denver / Boulder, Colorado
845.594.5164 | alice@askalice.me | askalice.me | github.com/AskAlice

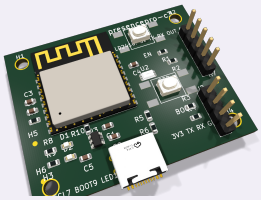

HOME AUTOMATION PCBS

Open KiCad swarm of ESP32 room nodes - ESPHome, Matter/Thread, Zigbee, BLE, Wi-Fi. Early-stage designs; renders live here because GitHub main never got the binaries. The images below are KiCad 3D renders of early-stage designs.

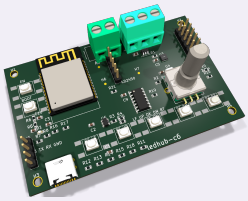

SenseNode C6

Environmental sensing: SHT31, BH1750, BMP280, and PIR.

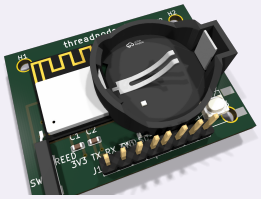

PresencePro C3

mmWave presence sensing with lux gating.

LEDHub C6

WLED / ESPHome controller with TFT and physical controls.

ThreadNode H2

Battery Matter-over-Thread / Zigbee contact and button node.

SELECTED SOFTWARE

search.emu.sh

Fastify + TypeScript omnibox and search engine with bangs, DNS, IP geolocation, crypto prices, and LLM routing.

react-flex-animations

TypeScript library for smoothly showing, hiding, and reflowing flexbox children.

react-three-midi

MIDI and audio analysis inside a react-three-fiber scene. Live at viz.emu.sh.

home-automation-pcbs

Eleven ESP32 room-node designs for ESPHome, Matter / Thread, Zigbee, BLE, and Wi-Fi.

PHOTOGRAPHY & CREATIVE WORK
