

Alice Knag

CYBERSECURITY-FOCUSED WEB ENGINEER | FULL-STACK DEVELOPMENT & EMERGING TECHNOLOGIES

CYBER OPERATIONS & PRE-LAW STUDENT AT UNIVERSITY OF ARIZONA

845.594.5164 || alice@askalice.me

PROFESSIONAL EXPERIENCE

June 2023 – Present | Software Engineer
Peklava, LLC

- Engineered scalable lead generation systems for RateZip and FHA.com, processing 80k+ leads annually across Google, Facebook, and programmatic channels
- Built automated mortgage rate comparison tools and optimized conversion funnels driving 1M+ consumer referrals
- Architected high-performance landing pages and API integrations reducing customer acquisition costs by 35% while maintaining sub-200ms response times

May 2022 – May 2023 | San Fransisco, CA / Remote
Sony Interactive Entertainment

Full stack. Typescript, React, Nest.js, Prisma, Figma, Kubernetes, Groovy, Jenkins. Designed and built a front-end table that could scroll, sort, and fuzzy search through 50,000+ rows without lag, as well as a details page that aggregated and visualized the progress of many related CI/CD automations

June 2019 – Dec 2021 | Software Engineer | Boulder, CO
Section, io, Inc

I was poached straight out of college to work full time at Section. Worked with front-end, backend and DevOps.

- Designed and developed interactive tools and applications using React, Pixi.js, GraphQL, Golang, and Kubernetes. [Demo](#)
- Built and maintained reverse proxy modules, automated deployment pipelines, and metrics stacks using Prometheus, Log Rocket, Graphite, Grafana, Open tracing, Elasticsearch, and New Relic.
- Worked as a Platform Reliability Engineer on a PagerDuty on-call rotation, utilizing Kubernetes, Ubuntu Server, Terraform, CloudFormation, Jenkins, and Github Actions.

2017 - 2018 | Linux Systems Administrator
University of Colorado: Boulder

Maintained and administered various web servers used by faculty. Left because I was making more w/ freelance. Technologies used: RHEL, Ansible, LAMP, ServiceNow.

01/2014 – 06/2019 | Web Developer
Freelance

Back-end Technologies: PHP, Python, Node.js, Laravel, Drupal, MySQL, MongoDB
Front-end Technologies: HTML5, CSS3, SASS, JavaScript; Vue, Angular, React, Three.js, Jade, Smarty, Materialize, Bootstrap, Photoshop, Illustrator
Kubernetes, Apache, nginx, AWS, GCP

- Created banner ads, email templates for mortgage lead generation website.
- Occasionally designed sales funnels capable of
- >\$100k/mo revenue (market conditions allowing)
- Designed the logo and the original home page.

EDUCATION

08/2017 – 05/2019 | Computer Science
University of Colorado: Boulder

Became a sophomore then was offered a 6 figure job out of the blue.

Jan 2024 – Jun 2024 | CYBER OPERATIONS & PRE-LAW STUDENT
UNIVERSITY OF ARIZONA

SKILLS & ABILITIES

LANGUAGES

- Javascript/Typescript/Node
- Golang
- HTML/CSS/SCSS
- PHP
- Python

DESIGN

- Figma
- Adobe Photoshop
- Adobe Illustrator
- Adobe After Effects/Lottie

MISC

PCI Compliance, Agile Software Development, Web Application Security, Ethical Hacking, Marketing.

HOBBIES

Music Production, Game Development, Inline Skating Home Automation.

<https://riseintime.com/>(help development in free time

AWARDS

- 2018 CU Blockchain Hackathon 2nd Place winner (0.5 ETH)
<https://devpost.com/software/bitpixels>
- Award from the state of New York from my experience as 4-year team captain of FIRST Tech Challenge Robotics Team #6567

LIBRARIES

React, Vue, Angular, Drupal, Laravel, Magento, WordPress, Three.js, D3

DevOps

- General Linux SysAdmin knowledge.
- Kubernetes
- Ansible
- Puppet
- CloudFormation
- AWS
- Google Cloud
- Terraform
